

CryoEase® Service

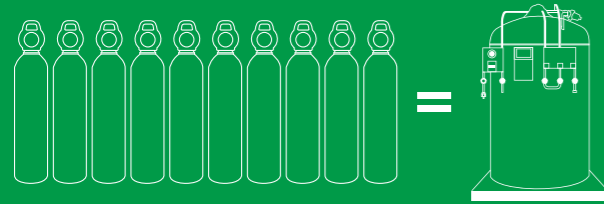

Compact Bulk Gas Supply

**AIR
PRODUCTS** 

What is the CryoEase® service?

The CryoEase® service is an easy compact supply solution for those medium to large gas users. It offers a highly adaptable gas supply and suits a vast range of industries; it's also quick to install with minimal commitment and low investment.

If you're using 10 cylinders or more a month, you need our CryoEase® service.

Why would I want the CryoEase® service?

Q. Are you wasting time changing over cylinders or packs?

A. The CryoEase® service eliminates the need for handling or changing over cylinders. Our drivers will refill the tank on a regular basis without any input from you, leaving you free to get on with your day job.

Q. Are you looking for a large gas solution without significant financial investment?

A. No capital investment is required with the CryoEase® service. Installation can take as little as 2 hours and costs are minimal, while you get all the benefits of a liquid gas supply.

Q. Are gas cylinder packs taking up valuable space in your workplace that could be better utilised?

A. The CryoEase® tank can be easily installed outside of your premises, all that is needed is a flat surface, or even a skid.

Q. Is the CryoEase® service a cost effective solution?

A. As gas is delivered in bulk form this reduces the cost per m³ of gas. Having larger storage facilities on site will reduce the number of deliveries and charges too.

Three easy steps to get started

The process

Site visit

Your local Air Products' representative will visit to complete a site survey. They will discuss desired flow rates and pressures. They will also advise you on a suitable location for the CryoEase® tank.

Engineering review

Air Products' Engineering team will review the provided information and ensure that all relevant safety precautions are met. They will examine the process data to create a technical specification bespoke for your application.

Installation

Once we are both in agreement on the project, we will prepare the CryoEase® tank in our UK-based workshop and arrange a suitable installation date with you.
